

What the invention claimed is:

1. A vehicle air freshener comprising:

a bottle, said bottle having a downwardly protruded
bottom mounting flange and a socket sealed to a bottleneck
5 thereof;

a fluid filled in said bottle;

a volatile liquid perfume filled in said bottle and
floating on said fluid, said volatile liquid perfume having a
gravity smaller than said fluid;

10 an absorptive core member mounted in said socket and
extended to said volatile liquid perfume and adapted to dissipate
said volatile liquid perfume into air outside said bottle;

an ornament mounted inside said bottle and dipped in
said volatile liquid perfume and said fluid, said ornament having
15 a weight fixedly secured to a bottom side thereof;

a base fastened to the downwardly protruded bottom
mounting flange of said bottle; and

a bottle cap fastened to the bottle neck of said bottle
around said socket, said bottle cap having a center through hole
20 adapted to accommodate the bottleneck of said bottle, and a
plurality of wire holes for mounting cord members.

2. The vehicle air freshener as claimed in claim 1,

wherein said base has a flat bottom surface mounted with a double-sided adhesive tape for fastening.

3. The vehicle air freshener as claimed in claim 1, wherein said second fluid is colored with a color substance.
